

Design for server side script for feedback form

Below is an example of how your form may look

First Name

Second Name

email

These will be text fields

We hope you like the site Aardvark world to help us improve we would welcome your feedback

Are you

Male

Female

Age

under 18 18-25 25- 40 40 - 60 over 60

These will be radio buttons

Which features did you like best tick any you liked

Videos

Colours

Pictures

Slideshow

This will be multiple choice tick box question

Question types

Radio button – shows options on screen only one allowed. Good for a few chopices

Multiple choice - tick box shows options as a list can pick 1 or many

Drop down list- many choices on a list can pick only one. Good where there are lots of choices as saves room.

Text box – lets user type in a text answer. Good where you want a name or a postcode for example.

Memo or text box- allows user to type in a long text based answer useful where you want a dtailed answer or opinion.
